

Next stop on the ABCs tour of Wyoming's geologic wonders ...

Niobrara Formation

*Photo by: WSGS coal
geologist Christopher Carroll*

- ***Niobrara Formation is a good oil producer***
- ***Photo taken 22 miles south of Rawlins in Carbon County***
- ***Entire hillside exposure of the formation & the Steele Shale***
- ***Niobrara Formation here is very shaley but cliff-forming in the left side of the hill***
- ***Oil production in the subsurface is nearby***
- ***Fields that produce from the Niobrara Formation are red on map***

*Interpreting the past, _____
providing for the future*
